

Strong Women and Strong Women Advance Program
12-Week Participant Registration Form
March 13-June 2, 2017

LIFTING WOMEN TO BETTER HEALTH

The Walworth County Strong Women Program includes aerobic exercises, progressive weight training, flexibility and balance activities. These exercises are safe and effective for women and men of all ages, including those who are not in perfect health. The StrongWomen Program is a national evidence-based community exercise and nutrition program based on research conducted by Dr. Miriam Nelson and colleagues at Tufts University. The Walworth County Strong Women Program combines the two programs developed for a balanced exercise program:

- The StrongWomen -Strong Bones Program is based upon years of research on how strength training and proper nutrition improve the health of women of all ages. “Strength is a critical factor in living healthier, more active lives. Our research shows that a program of strength training not only improves bone density but reduces falls, improves arthritis symptoms, and increases flexibility and strength,” States Dr. Nelson. The program is appropriate for both sedentary and very active women. People with health concerns such as arthritis, heart disease, osteoporosis, diabetes, obesity and back pain often benefit the most from an exercise program that includes lifting weights a few times each week.
- The StrongWomen - Healthy Heart Program is a cardiovascular disease prevention program that aims to help reduce the risk of heart disease through fitness and nutrition education. The program is also designed to help with weight control. Over the course of the program, the aerobic exercises progress in duration and intensity.

The Walworth County Strong Women Program has two levels to participate in StrongWomen and Advanced StrongWomen. The StrongWoman Program features low to moderate impact cardio and weight training done with the use of a chair for stability that is easily adapted to any ability level. The Advanced StrongWoman Program features moderate to high impact cardio and weight training that is done standing or on mats on the floor. Participants do not have to purchase any equipment but only asked to wear supportive shoes and comfortable clothing.

I'd like to participate in:

Select your choice	Program Name
<input type="checkbox"/>	Strong Women on Wednesdays and Fridays 9-10 am Cost \$20 for returning participants and \$25 for new participants * minimum of 15 participants needed to hold the class.
<input type="checkbox"/>	Advanced Strong Women on Monday, Wednesdays and Fridays 9-10 am Cost \$25 for returning participants and \$30 for new participants * minimum of 16 participants needed to hold the class

Please return this form with fees to secure your space. Forms received by March 8 will be sent an email and/or paper confirmation. Please make check out to: UW-Extension – Strong Women. Please return all forms to:

UW-Extension Office – Strong Women
100 West Walworth Street
Elkhorn, WI 53121

The University of Wisconsin-Extension provides affirmative action and equal opportunity in education, programming and employment for all qualified persons regardless of race, color, gender/sex, creed disability, religion, national origin, ancestry, age, sexual orientation, pregnancy, marital or parental, arrest or conviction record or veteran status.

If you require reasonable accommodations to participate in programming, please contact Amanda Kostman (262) 741-4961 or TTY 711.

Strong Women Program Participant Consent

LIFTING WOMEN TO BETTER HEALTH

STRONGWOMEN

I have voluntarily enrolled in a program of progressive exercise. The program is designed to place a gradually increased workload on the heart, lungs, muscles and bones to help improve their function. I understand that participation in such a program may be associated with some risks. These risks may include but are not limited to: muscle soreness, fainting, disorders of the heartbeat, abnormal blood pressure, and in very rare instances, heart attack. To the best of my knowledge I do not have any limiting physical conditions or disability that would preclude an exercise program. Effort will be made to minimize any risks to me by a pre-exercise assessment and a medical screening. I release everyone who has designed, promoted, or conducted the StrongWomen™ Program from all claims or liabilities whatsoever resulting from my participation in this program. I assume all risks and responsibility for any injury, damage, or any other adverse event that may result from my participation in this program.

Before I begin this program I understand that a pre-exercise assessment and physician screening consent form may be required. I understand that each person may react differently to these fitness activities and these reactions cannot be predicted with complete accuracy. I will inform the Program Leader and my health care provider if I experience any unusual symptoms.

I understand that instructors or staff may take videos and pictures of the participants during classes. UW-Extension will use these videos and pictures in a manner consistent with UW-Extension's mission. Your attendance at these events indicates your consent for your image to be recorded and used in this manner.

The StrongWomen Program

Physical Activity Readiness Questionnaire (PAR-Q)

Regular physical activity is fun and healthy. Increasingly people are starting to become more active every day. Becoming more active is very safe for most people. However, if participation in any of the StrongWomen programs will cause you to become substantially more active than you are at present start by answering the questions below. If you are between the ages of 15 and 69 the PAR-Q will tell you if you should check with your doctor before you start. If you are over 69 years of age and you are not used to being active, check with your doctor. Common sense is your best guide when you answer these questions. Please read the questions carefully and answer each one honestly.

Question	Yes	No
Has your doctor ever said that you have a heart condition and that you should only do physical activity recommended by a doctor?		
Do you feel pain in your chest when you do physical activity?		
In the past month have you had chest pain when you were not doing physical activity?		
Do you lose balance because of dizziness or do you ever loss of consciousness?		
Do you have a bone or joint problem that could be made worse by a change in your physical activity?		
Is your doctor currently prescribing drugs for your blood pressure or heart condition? (example: water pills/blood thinners)		
Do you have any other reason why you should not do physical activity?		

Note: * During participation in the Strong Women Program, if your health changes so that you answer YES to any of the above questions tell your fitness or health professional. Ask whether you should change your physical activity. **Informed use of the PAR-Q: The Canadian Society for Exercise Physiology Health Canada and their agents assume no liability for persons who undertake physical activity and if in doubt about completing their questionnaire consult your doctor prior to physical activity.

If you answered "Yes" to one or more questions talk to your doctor BEFORE you start becoming more physically active or BEFORE you have a fitness appraisal. Tell your doctor about the PAR-Q and to which questions you answered YES.

- You may be able to participate in any of the activities offered by starting slowly and building gradually. Or you may need to restrict your activities to those which are safe for you. Talk with your doctor about the kinds of activities you wish to participate in and follow his/her advice.
- Find out which community programs are safe and beneficial to you.

If you answered "NO" honestly to all of the PAR-Q questions you can be reasonably sure that you can:

- Start becoming more physically active. Begin slowly and build up gradually. This is the safest and most beneficial way to begin a more active lifestyle.
- Take part in a fitness appraisal. This is an excellent way to determine your basic fitness so that you can plan the best way for you to live actively.

Delay becoming much more active:

- If you are not feeling well because of a temporary illness such as a cold or fever; wait until you feel better.
- If you are or may be pregnant, talk to your doctor before you start becoming more active.

I have read, understood and completed this questionnaire. Questions I had were answered to my full satisfaction.
